BST-105

Self-Ignition 10-in-1 Cordless Welding Torch Kit Tool Outdoor portable Butane Torch Gas Soldering

Product Description

Model: BST-105

- Application:
- Relaxation corroded metal screw kit heated Research Laboratory
- Kitchen baking tool factory equipment maintenance
- Welding cars, trucks, aviation repair repair hydropower project
- Electrical appliances, electrical control box repair welding
- Wire circuit board repair welding IC board welding repairs
- Home field line multi-use welding repair
- Component welding
- Jewelry, Eyewear plastic cutting maintenance industry
- Pen style design is unique and elegant.
- High capacity and excellent performance.
- With autoignition function for convenient use.
- Compact size, lightweight and portable to carry.
- Use gas as its power without voltage and wire limitation.
- Without location limitation.
- Can be used as ordinary soldering iron, heat gun or flame gun, very practical.
- Transparent design make you have easy access to inside gas.
- 10-in-1 electronic ignition gas soldering iron with automatic ignition function, With lighter gas-to-energy, compact and easy to carry,.

PRODUCT DETAILS

Brand:	BEST	Model:	BST-105
Aeration amount:	15G	Use Time:	90-120 min
Open fire:	1300℃	Iron:	450℃
Size:	135MM*260MM*44MM	Weight:	0.35KG
Uses:	laboratory, factory equipment maintenance, welding, electrical equipment maintenance, component tin		
Features:	10 seconds warm up, gas inflated, can be used continuously, easy to carry, the tip can be replaced.		

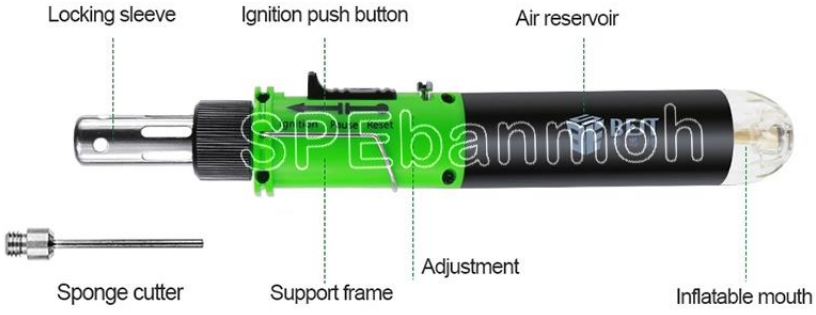
BST-105

Self-Ignition 10-in-1 Cordless Welding Torch Kit Tool Outdoor portable Butane Torch Gas Soldering

Solder tin wire

Inflatable head

Tin plate
Clean sponge



I tip | Single oblique tip | Bell mouth tip | Cutting head | K tip | Big pointed tip | Heating head
